Report for ForestQuery into Global Deforestation, 1990 to 2016

ForestQuery is on a mission to combat deforestation around the world and to raise awareness about this topic and its impact on the environment. The data analysis team at ForestQuery has obtained data from the World Bank that includes forest area and total land area by country and year from 1990 to 2016, as well as a table of countries and the regions to which they belong.

The data analysis team has used SQL to bring these tables together and to query them in an effort to find areas of concern as well as areas that present an opportunity to learn from successes.

B. LARGEST CONCERNS

Which countries are seeing deforestation to the largest degree? We can answer this question in two ways. First, we can look at the absolute square kilometer decrease in forest area from 1990 to 2016. The following 3 countries had the largest decrease in forest area over the time period under consideration:

Table 3.1: Top 5 Amount Decrease in Forest Area by Country, 1990 & 2016:

Country	Region	Absolute Forest Area Change
The second way to consider wh	ich countries are of concern is to	analyze the data by percent
decrease.		
Table 3.2: Top 5 Percent Decre	ase in Forest Area by Country, 1	990 & 2016:
Country	Region	Pct Forest Area Change
find that four of the top 5 countries are	at decreased in forest area the miles on the list are in the region of,,, country on the list is	The , and
the top 5 both in terms of absoluted decrease in forest area from 19	e that is to the square kilometer decrease in 90 to 2016. Therefore, this count opefully spearhead remedial effo	forest as well as percent ry has a significant opportunity
the top 5 both in terms of absoluted decrease in forest area from 19	ute square kilometer decrease in 90 to 2016. Therefore, this count	forest as well as percent ry has a significant opportunity
the top 5 both in terms of absoluterease in forest area from 19 ahead to stop the decline and h	ute square kilometer decrease in 90 to 2016. Therefore, this count	forest as well as percent ry has a significant opportunity orts.

The largest number of countries	in 2016 were fo	und in the	quartile.
There were	neir land area de rest land, denote	esignated as fore	est. The following is a list of
